After the implementation of the campaign to educate party members about the mass line and “The Three Guidelines for Ethical Behavior and the Three Basic Rules of Conduct” special education, ideals, convictions, party spirit and a down-to-earth spirit of most party members are strengthened. However, there are still some party members who have weakened their party spirit, lacked awareness of alignment, weakened ideas and purposes and owned a passive working attitude. As a main education position for party institutional construction, party member education and other aspects, private university, which have flourished, still have these above problems and even have worse ones.

(1)Primary Party Organization’s Role of Battlewagon is Unobvious

Most workers of primary party organizations of private universities basically have more job responsibilities than they should have taken, so they have insufficient energy to work and a lack of enthusiasm for work, and the primary party organization’s role of battlewagon is not obvious. In particular, the theoretical learning is in lack of innovation in the form. The theoretical study for party members has remained the traditional mode of reading documents. The time for interaction
between parties and primary party organizations is relatively short, and primary party organization`s role of battlewagon is not prominent enough.

(2) Party members among teachers of private universities have not fully played their exemplary vanguard role

On the one hand, some party members among teachers are not active learners of political theories. They believe that the learning take their time to participate in the teaching and scientific research activities, and always take busy work as an excuse to avoid the “Remain to Our Original Aspiration and Keep Our Mission Firmly in Mind” theme education, meeting of democratic life and others, so that their political theoretical study is not deep and their ideological and political study is lack, shallow and loose. On the other hand, they do not really discipline themselves strictly with the standard requirements for party members. Considering themselves as the masses, they have no positive working attitude or high ideological awareness and take the work style of indifference, so they do not reflect the work style a party member should haven in terms of work and study.

(3) Party spirit of party members among students is not strong enough

Most of the students in private universities have the eager desire to join the Communist Party of China, are enthusiastic about applying to join the party, actively participate in various activities organized by the school, strive to express themselves, and strive for the admiration from teachers and students. However, when a minority of students are admitted to the Party, they do not strictly discipline themselves according to the requirements for a Party member. There are several main reasons. The first reason if a lack of strict organizational life experience. Since most students of private universities study at school for three or four years, and after being party members, these students face internship, so they become “mobile party members” that are difficult to contact, and their party spirit is thus weakened; secondly, some students, after being party members, believe that they are more excellent than other students, so they cut themselves from other students, and their influence among other students is thus weakened.
