Keywords: New-Quality Discipline Inspection and Supervision Power, Comprehensively Governing the Party Strictly, Artificial Intelligence

Abstract: This paper proposes the concept of "New-Quality Discipline Inspection and Supervision Power" and conducts an in-depth discussion on its definition, characteristics, and practical application. With the implementation of the strategy of comprehensively governing the Party strictly and the advancement of socialist modernization, discipline inspection and supervision face new challenges and demands. The article first analyzes the limitations of traditional discipline inspection and supervision work, pointing out the inadequacy of its supervision methods and scope. Subsequently, it elaborates on the connotation of "New-Quality Discipline Inspection and Supervision Power," emphasizing its characteristics in political supervision, technology application, and systematic supervision. New-Quality Discipline Inspection and Supervision Power not only values traditional integrity supervision but also emphasizes the use of modern technological means, such as artificial intelligence, and the establishment of a systematic supervision system to improve efficiency and accuracy. The core of this paper lies in explaining how New-Quality Discipline Inspection and Supervision Power adapts to the requirements of the new era and provides new theoretical and practical directions for discipline inspection and supervision work.

1. Introduction

Since the 18th National Congress of the Communist Party of China (CPC), the CPC Central Committee has attached great importance to discipline inspection and supervision work, put forward the strategy of comprehensively governing the Party strictly, and promoted historic achievements in this field. Discipline inspection and supervision organs shoulder the important responsibility of upholding Party discipline and the intra-Party political ecosystem and play a key role in promoting the comprehensive and strict governance of the Party and advancing the modernization of China's system and capacity for governance.

However, with the continuous advancement of socialist modernization, discipline inspection and supervision work also faces new challenges. On the one hand, corruption has taken on new trends and characteristics, requiring continuous innovation and improvement in discipline inspection and supervision work. On the other hand, the people have increasingly high expectations for discipline inspection and supervision work, demanding more accurate and effective supervision and

accountability. This requires discipline inspection and supervision work to keep pace with the times and proactively adapt to the needs of the new situation and new tasks.

To this end, the author proposes the concept of "New-Quality Discipline Inspection and Supervision Power" to analyze the new characteristics and requirements of discipline inspection and supervision work in the new era, providing theoretical and practical guidance for further promoting its innovative development. This paper will systematically elaborate on the connotation of New-Quality Discipline Inspection and Supervision Power, its main characteristics, and its specific application in practice, hoping to provide a strong disciplinary guarantee for the development of the Party and the country.

2. Definition of New-Quality Discipline Inspection and Supervision Power

Discipline inspection and supervision power is an important part of the Party and state's supervision and management system, playing a key role in comprehensively governing the Party strictly and modernizing national governance. With the development and changes in the situation, the traditional discipline inspection and supervision model can no longer fully adapt to the new requirements and needs to keep pace with the times and continuously innovate and develop.

2.1. Characteristics and Limitations of Traditional Discipline Inspection and Supervision

The traditional discipline inspection and supervision model focuses more on the single issue of clean and honest conduct, with relatively simple supervision methods, mainly relying on manual review and other means. Although certain achievements have been made, there are limitations: the supervision focus is too narrow, the supervision methods are relatively backward, and the supervision mechanism is not systematic enough, making it difficult to fundamentally curb the breeding of corruption.

2.2. Interpretation of the Connotation of New-Quality Discipline Inspection and Supervision Power

In response to the above problems, the author proposes the concept of "New-Quality Discipline Inspection and Supervision Power." In the context of the new era, it refers to the brand-new characteristics and connotations presented by discipline inspection and supervision work, namely, paying more attention to political supervision, focusing on addressing both symptoms and root causes, emphasizing the use of modern technological means, adhering to the principle of equal emphasis on discipline and law, and emphasizing the combination of punishment and education. New-Quality Discipline Inspection and Supervision Power is a new type of discipline inspection and supervision capability formed by discipline inspection and supervision organs under the guidance of Thought on Socialism with Chinese Characteristics for a New Era, adhering to the Party's overall leadership, strengthening political supervision, upholding the unwavering commitment to strictness, adhering to systematic governance and addressing both symptoms and root causes, adhering to strict and pragmatic measures and integrated efforts to promote "Three Nots" (not daring, not being able, and not wanting to be corrupt), adhering to a people-centered approach, striving to build a supervision system that integrates efforts to ensure officials do not dare to be corrupt, cannot be corrupt, and do not want to be corrupt, and continuously improving the quality and level of discipline inspection and supervision work. This New-Quality Discipline Inspection and Supervision Power incorporates the latest research results in the field of artificial intelligence in terms of technology, embodies the thought on Socialism with Chinese Characteristics for a New Era in terms of ideology, and reflects the firm determination of the Party in the new era to

carry out self-revolution and self-purification.

2.3. Theoretical Basis of New-Quality Discipline Inspection and Supervision Power

The proposal of New-Quality Discipline Inspection and Supervision Power originates from the understanding of the nature of the socialist state in Marxism and the new concepts and requirements for comprehensively governing the Party strictly since the 18th National Congress of the CPC. It is a brand-new theory formed by absorbing and developing the traditional discipline inspection and supervision theory, adapting to the characteristics and development needs of the new era.

In conclusion, New-Quality Discipline Inspection and Supervision Power fully embodies the new characteristics and requirements of discipline inspection and supervision work in the new era and will surely provide theoretical guidance for promoting discipline inspection and supervision to a new level.

3. Main Characteristics of New-Quality Discipline Inspection and Supervision Power

Compared with the traditional model, New-Quality Discipline Inspection and Supervision Power presents the following main characteristics:

3.1. Strengthening the Guiding Role of Political Supervision

Discipline inspection and supervision work is a responsibility entrusted by the Party Constitution and the Constitution.^[1]New-Quality Discipline Inspection and Supervision Power attaches great importance to political supervision, adheres to the highest political principle of upholding the Party's leadership, and strives to safeguard the Party's leadership and the socialist system. It not only focuses on specific issues such as clean and honest conduct but also conducts comprehensive supervision over major issues involving the Party's cause and national interests, ensuring the implementation of the Party's lines, principles, and policies.

3.2. Systematic and Specialized Supervision System

New-Quality Discipline Inspection and Supervision Power focuses on establishing a systematic and specialized supervision system to achieve both symptom treatment and root cause elimination, emphasizing both prevention and punishment. It is no longer limited to post-event investigations but prevents and curbs the occurrence of corruption from the source by improving the supervision system and optimizing the working mechanism.

3.3. Actively Utilizing Modern Technological Means

Big data technology is crucial for discipline inspection and supervision work.^[2]Artificial intelligence can fully empower discipline inspection and supervision.^[3] It can achieve accurate and comprehensive supervision, ensuring that the supervision of power is more open and transparent.^[4]New-Quality Discipline Inspection and Supervision Power attaches great importance to the application of modern information technologies such as big data and artificial intelligence, building an intelligent supervision platform integrating data collection, analysis, and early warning. This not only improves the accuracy and effectiveness of supervision but also enhances its foresight and pertinence.

3.4. Achieving Equal Emphasis on Discipline and Law, Combining Punishment and Education

New-Quality Discipline Inspection and Supervision Power adheres to the principle of equal emphasis on discipline and law, focusing on playing the role of education and guidance while punishing violations of discipline and law, enhancing the awareness of discipline and responsibility among Party members and cadres. This supervision model, which emphasizes both punishment and prevention and integrates discipline and law, is conducive to maintaining the authority of the system and promoting the formation of a long-term mechanism for building a clean and upright government.

In conclusion, these significant characteristics of New-Quality Discipline Inspection and Supervision Power will surely promote discipline inspection and supervision work to a new level, providing a solid disciplinary guarantee for the development of the Party and the country.

4. Application of New-Quality Discipline Inspection and Supervision Power in Practice

The application of New-Quality Discipline Inspection and Supervision Power in practice is mainly reflected in the following aspects:

4.1. Deepening Political Supervision and Safeguarding the Party's Leadership and the Socialist System

New-Quality Discipline Inspection and Supervision Power takes political supervision as its primary task, upholds and strengthens the Party's overall leadership, strictly implements political discipline and rules, and ensures the comprehensive implementation of the major decisions and deployments of the CPC Central Committee in all regions and departments. Through strict political supervision, it effectively safeguards the Party's leadership and the socialist system.

4.2. Strengthening Both Symptom Treatment and Root Cause Elimination, Promoting Systematic Supervision

New-Quality Discipline Inspection and Supervision Power focuses on establishing and improving a systematic and specialized supervision system to achieve both symptom treatment and root cause elimination, emphasizing both prevention and punishment. On the one hand, it deepens supervision over key areas and links, investigating and dealing with violations of discipline and law. On the other hand, it strives to improve the supervision system and mechanism, preventing and curbing the occurrence of corruption from the source.

4.3. Empowering with Big Data, Enhancing Supervision Accuracy and Effectiveness

New-Quality Discipline Inspection and Supervision Power gives full play to the power of modern information technologies such as big data and artificial intelligence, building an intelligent supervision platform integrating data collection, analysis, and early warning, improving the ability to identify violations of discipline and law. At the same time, it uses automated and intelligent means to optimize the law enforcement process, enhancing the pertinence and timeliness of supervision.

4.4. Combining Punishment and Education, Enhancing the Educational and Guiding Function of Supervision

New-Quality Discipline Inspection and Supervision Power adheres to the principle of equal

emphasis on discipline and law, combining punishment and education, emphasizing the role of education and guidance while severely punishing violations. By carrying out in-depth publicity and education on laws and regulations, it guides Party members and cadres to consciously enhance their political awareness and initiative, and consciously safeguard the authority of the CPC Central Committee and its centralized and unified leadership.

In conclusion, the multi-faceted innovation and application of New-Quality Discipline Inspection and Supervision Power in practice will surely effectively promote the Party's self-revolution and self-purification, providing a strong guarantee for the development of the Party and the country.

5. The Key to Enhancing New-Quality Discipline Inspection and Supervision Power Lies in Generative Artificial Intelligence

Since OpenAI released ChatGPT3.5 on November 30, 2022, human productivity has taken a whole new leap forward. ChatGPT is a typical generative artificial intelligence, whose powerful text generation and intelligent question-answering capabilities can fully empower all aspects of New-Quality Discipline Inspection and Supervision Power, becoming the key to improving supervision effectiveness. The development of generative artificial intelligence technology has brought significant opportunities for enhancing New-Quality Discipline Inspection and Supervision Power.

Firstly, generative artificial intelligence can significantly improve the work efficiency of discipline inspection and supervision personnel. Through natural language processing and knowledge reasoning, generative artificial intelligence can quickly read a large number of documents and intelligently analyze and summarize the key information and potential problems, providing targeted suggestions for law enforcement personnel. At the same time, generative artificial intelligence can also assist in writing various investigation reports, legal documents, etc., greatly reducing the burden of manual writing. This role of "machine assistant" will surely greatly improve the efficiency and level of discipline inspection and supervision work.

Secondly, the intelligent question-answering capability of generative artificial intelligence can also enhance the preventive nature of New-Quality Discipline Inspection and Supervision Power. Through training, generative artificial intelligence can establish a knowledge base covering laws, regulations, policies, cases, etc., providing intelligent legal consultation and guidance for Party members and cadres. This will help to raise awareness of discipline and law, prevent violations before they occur, and promote the formation of a good atmosphere of integrity.

Thirdly, generative artificial intelligence can also play an important role in promoting the modernization of the discipline inspection and supervision system and capacity for governance. By analyzing massive data, generative artificial intelligence can identify systemic loopholes and weak links in discipline inspection and supervision work, providing data support for decision-making and optimizing the allocation of supervisory resources. At the same time, generative artificial intelligence can also assist in building a more intelligent and efficient supervision platform, realizing real-time monitoring and early warning of key areas and links, and improving the pertinence and effectiveness of supervision.

In conclusion, generative artificial intelligence, as a disruptive technological innovation, will inevitably bring profound changes to discipline inspection and supervision work. Actively embracing generative artificial intelligence and giving full play to its technological advantages will surely become the key to enhancing New-Quality Discipline Inspection and Supervision Power and promoting the high-quality development of discipline inspection and supervision in the new era.

6. Conclusion

The proposition and practice of New-Quality Discipline Inspection and Supervision Power represent a significant embodiment of the strategy of comprehensively governing the Party strictly since the 18th National Congress of the CPC. It is also a concrete practice of the Party's self-revolution and self-purification in the new era. This concept profoundly explains the new characteristics and connotations of discipline inspection and supervision work in the new era, providing important guidance for promoting the innovative development of discipline inspection and supervision.

With its emphasis on political supervision as the primary task and its characteristics of addressing both symptoms and root causes, leveraging technological empowerment, and combining punishment with education, New-Quality Discipline Inspection and Supervision Power fully embodies the clear direction and renewed requirements of discipline inspection and supervision work in the new era. It not only helps to safeguard the Party's leadership and the socialist system and promote the comprehensive and strict governance of the Party to a deeper level, but also provides a strong guarantee for advancing the modernization of China's system and capacity for governance.

New-Quality Discipline Inspection and Supervision Power is bound to be continuously enriched and developed in practice. On the new historical journey, it will contribute even greater strength to realizing the Chinese Dream of national rejuvenation.
